Fixed-top or Flip-top Surface

Whether for a training room, meeting space or conventional office, the Genius table can be configured to meet the needs of various work environments. This multi-purpose table can be equipped with a cable management system if required and is easily stored in a vertical stacking position. Genius is the perfect union between simplicity and elegance.

In storage position, flip-top tables occupy a minimum of space due to the unique interlocking leg system.

The flip-top surface can be fitted with a cable tray for wire management. A laminate or metal modesty panel is also an option.

Legs and Footings

Two distinctly different leg styles are available on the Genius table, with either levelers or casters. The flip-top tables are equipped with casters allowing for easy storage.

Height adjustment of 26" to 32" is possible with the adjustable tubular leg.

The contemporary leg has a vertical cap in a choice of metal or laminate allowing for numerous color combinations.

The Genius table has cable management solutions specific to each leg style.

Cable Trays and Electricity

Full Length Cable Tray

- Allows for efficient wire management such as the 4 circuit electrical system.
- Can be fitted with a flip access door that also serves as a modesty panel.
- Easy access to plugs or other equipment.

Narrow Cable Tray

- Specific to flip-top surfaces.
- Can also be attached under any work surface, in any position (such as shown above).
- Can support various types of cabling except the 4 circuit electrical system.

1 Circuit Electrical System

Supply electricity for up to 8 tables from the same circuit

Reconfiguration flexibility

4 Circuit Electrical System

Recommended for permanent installations

Available exclusively with full length cable trays and fixed-top surfaces.

Without the flip door, one cable tray can serve two facing tables.

Types of power outlets

For standard plugs (data plugs optional)

EPA module

EPOS module

EPU module

Optional UC/EC modules

Moveable outlet

A moveable outlet can be inserted into the cable tray or attached under the surface.

Certain modules as well as the moveable outlet are available with a 120v. standard plug or with a male/female connection compatible with the 1 circuit electrical system.

Attached with one twist, the quick-lock brackets join the tables solidly together.
