the art and the purpose

Free yourself from your keys

The technology applied to Artopex metal storage products

With **NOKI** Technology, the ultra secure electronic locking system available on the majority of Artopex metal storage products, say goodbye to conventional locks and lost keys.

efficient, simple and secure

- A code unique to the user, department or filing cabinet – it's your choice!
- A forgotten code, an absent employee... An authorized person can obtain a master code from Artopex.
- The latch must be turned in order to lock the filing cabinet.
- After four attempts to open with an incorrect code, a brief alarm is activated.
- Battery or AC power supply. Negligible power consumption.

NOKI
technology
An innovation by Artopex

NOKI,
the keyless lock
from Artopex,
for added
security!

accessibility

The lock can be installed at a height of 36" to facilitate access.

electric option

Allows connection of the filing cabinet to an AC outlet.

and even more...

- Mechanism guaranteed 10 years.
- Compliance with ANSI/BIFMA standards.
- Patent and industrial drawings pending.

NOK*i*

The key is that there isn't one!

Artopex and the environment

- Our metal filing cabinets contain a minimum of 60% recycled materials and are over 98% recyclable.
- Our metal filing cabinets do not emit volatile organic compounds (VOC).
- The use of rechargeable batteries is recommended.
- Please dispose of used batteries with a designated collection and recycling facility.
