FPi 500

Tabletop inserting system

Your time is valuable. Don't waste it.

You know how it is. On some days everything seems to happen at once. Stacks of

daily correspondence, invoices and serial letters pile up while you tend to other

important tasks. Folding letters and stuffing envelopes takes time you just don't have.

Who wouldn't wish for a dependable little elf to take care of the outgoing mail –

quickly, quietly, dependably.

Solutions in a snap.

A wish becomes reality: The FPi 500 tabletop inserter is your perfect mail elf.
FPi 500 – the new tabletop inserting system – finishes your outgoing mail in a snap.
Get important correspondence and invoices out the door quicker so you can devote more time to your main responsibilities.

Conceived for your office.

A compact tabletop inserting system that delivers high performance in a small package and fits into every office. The FPi 500 pays for itself even in offices that mail just 50 letters a day. Folding and inserting those letters can cost a good 30 minutes of your time, while the FPi 500 does the job in just 3 minutes – at the press of a button.

Simple and fast:

Just load letters, envelopes and supplements into the corresponding stations. Follow the straightforward instructions in the display and the FPi 500 is ready to go to work. The system automatically folds and inserts your mail and seals the finished envelopes. Settings for recurring jobs can be stored and recalled at any time.

What do you want to do?

The FPi 500 happily handles your personal out-
going correspondence. Everything from post-card
sized mailings to standard business correspon-
dence. The daily-mail mode can select, fold and
insert five pages into a single envelope.
Three automatic feeder stations (two document
and one supplement station) deliver maximum
flexibility. Each station can hold 100 sheets of
paper. For non-stop operation the two document
stations can be switched to tandem mode: each
station works without interruption even when
the other station is empty, enabling you to reload
stations without stopping the machine.

Perfect for ads and brochures.

Promotional mail? No problem! Get the most out
of postage weight limits by using the supplement
feeder to add pre-folded or envelope-shaped fly-
ers, cards or reply-envelopes. The FPi 500 can
fold and insert up to 1,350 letters in an hour! It
can also help produce those pre-folded brochures:
Just disengage the inserting function to use the
FPi 500 as a paper-folding machine.

Advantage: FPi 500.

Outstanding value for the money!
Cost-effective with as few as 50 letters/day.

Minimizes unproductive manual work.

Folds and inserts your mail ten times faster
than by hand.

Increases your correspondence efficiency.

Flexibly handles regular correspondence,
invoices, serial and advertising mailings,
salary and wage statements, etc.

Processes widely-varied supplements (like
postcards, flyers, reply-envelopes).

Easy-to-see and easy-to-fill feeder stations.
Printed material faces forward.

User-friendly interactive display.

Job memory for recurring task settings.
