36" Wide  
AC powered  
Finish: Black

Codification: **45-48-036-YYY-3067-LT2**

Product code      Finish      NOKI

## Operation of the Lock

### ■ Unlocking (for the first use, please refer to the paragraph "Combinations" below)

- Step A: Enter the combination on the digital keypad.  
Step B: Press the OK button.  
Step C: Turn the latch to the "unlocked" position (180° clockwise).

The lock remains in the "unlocked" position as long as the latch is not returned to the "locked" position.

### ■ Locking

- Turn the latch to the "locked" position (180° counter clockwise).

## Combinations

### ■ Assigning a Combination Upon Delivery

All storage products with a NOKI lock have a default combination of 1-2-3-4.  
Follow these steps in order to assign a new combination to the lock:

- Step A: Enter the default combination (1-2-3-4).  
Step B: Press the OK button twice.  
Step C: When the confirmation light comes on, enter a new combination (from 1 to 8 numbers).  
Step D: Press the OK button once to confirm the new combination.  
The new combination is now in place and the default combination is no longer functional.

### ■ Modifying a Combination

It is possible to change the combination using the current combination (if you do not have the current combination, please see paragraph 3 – *A Lost or Forgotten Combination*). Follow these steps in order to change the current combination:

- Step A: Enter the current combination to be modified.  
Step B: Press the OK button twice.  
Step C: Enter a new combination (from 1 to 8 numbers).  
Step D: Press the OK button once to confirm the new combination.  
The new combination is now in place and the previous combination is no longer functional.

### ■ A Lost or Forgotten Combination

In the case of a lost or forgotten combination, contact Artopex's Customer Service Department. Have the serial number of the lock on hand for reference (written on the top edge of the lock). After verification of your identity, Artopex will give you the "master" combination specific to this lock. With this combination you will then be able to reconfigure the combination as explained above (Paragraph 2 - *Modifying a Combination*).

## General Information

A 60 second alarm is activated after 4 attempts to open with an incorrect code. In the case of a power outage or exhausted batteries, plug in the back-up power supply (BPS) into the outlet located under the confirmation light on the lock. ATTENTION: do not leave the BPS inside the filing cabinet. Compliant to ANSI/BIFMA standards. Mechanism guaranteed 10 years. Patent and industrial drawings pending.
